JORDANO'S FOODSERVICE demonstrates a profound commitment to environmental stewardship by actively sourcing and providing products with a strong emphasis on recycling, durability, and sustainable packaging, as highlighted in our "Green Guide." This dedication is evident in our offering of compostable and plant-based packaging, including NatureNow products made from renewable resources like Ingeo™ biopolymer (PLA) and bagasse sugarcane. Beyond compostables, we champion plastic reduction and recyclability through items like our Take-OutNow containers, which incorporate natural mineral powder, and by promoting reusable options such as MicroNow and DeliNow containers, along with recyclable cutlery and paper plates. Furthermore, Jordano's focuses on efficiency and waste reduction by offering streamlined solutions like single lid series for multiple cup sizes and by forging strategic partnerships with environmentally certified suppliers, ensuring responsible sourcing and waste minimization across their entire supply chain.

Avolutions Inc. is a company dedicated to combating plastic pollution by offering innovative, biodegradable alternatives to single-use plastics. Primarily, Avolutions Inc. specializes in products made from agave fiber resin, such as biodegradable straws and cutlery, which are designed to naturally break down within a reasonable timeframe, thus preventing accumulation in landfills and oceans. By leveraging renewable resources and meeting international biodegradable standards, Avolutions Inc. aims to be a key player in the growing market for eco-friendly products, helping businesses and individuals make a positive environmental impact.

Imex Vision, based in Lake Forest, CA, is a USA manufacturer of high-quality, disposable foodservice products. Since 2006, they've specialized in "Made in the USA" paper cups and containers for hot and cold items, including single-wall, double-wall, and ripple styles. With a strong commitment to sustainability, their Adama line offers fully compostable, PFAS-free, and curbside recyclable options made from plant-based materials. Imex Vision also provides full-color custom printing to enhance brand visibility.

NowPak containers are optimal for takeout, curbside pick-up, or delivery for all of your hot and cold foods. With so many options that are environmentally friendly, recyclable, compostable, and microwavable, NowPak has the perfect high-quality, low-cost packaging solution for your operation.

DeliNow reusable containers are designed to hold everything from hot soup to rice and beans to nuts. They are virtually leak-proof and withstand high heat from microwaving, and they stack great while the clear design allows for easy product identification.

MicroNow containers are offered in a variety of shapes with black bases and translucent lids. Their 2-piece, heavy-gauge construction makes these a great option for prepared foods or food to-go. They are reusable, microwavable, and dishwasher safe.

Eco-friendly, heavy-duty, and compostable, the NatureNow product line is made from bagasse sugarcane, using only sustainable raw materials. Microwave safe and cut resistant.

Eco-friendly and patented, Take-OutNow, hinged to-go containers are made from polypropylene and a natural mineral powder that reduces the amount of plastic used in the finished product. Durable, with a full rim seal, these containers are microwave safe and able to withstand high heat.

Perfect Crust Pizza Liners are designed to eliminate soggy crusts and keep pizzas warmer during delivery by absorbing grease and allowing moisture to escape through patented bumps. The company prioritizes sustainability, with their pizza liners being recyclable, compostable, and biodegradable, and also PFAS-free, demonstrating their commitment to eco-friendly and safe packaging solutions.

WORLD CENTRIC

FOR A BETTER WORLD

World Centric is a certified B Corp that manufactures compostable and reusable foodservice and packaging products from renewable plant-based materials like sugarcane, bamboo, and corn starch. Their core mission is to “be of service to people and the planet” by creating sustainable alternatives to plastic and polystyrene, while also donating at least 25% of their profits to grassroots social and environmental organizations globally to address issues like poverty and climate change.
